Education & Research

American Academy of Oral and Maxillofacial Pathology

ANNUAL MEETING & CONTINUING EDUCATION PROGRAM

MAY 17-21, 2003
BANFF, CANADA

PRESIDENT'S MESSAGE

**Douglas D.
Damm, DDS**
**President's
Message**

As I write this, it is
the middle of

January and there is snow on the ground, making it a good day to stay inside and write a newsletter. Hopefully, by the time this message arrives, another spring is blossoming; and the winter pleasures are giving way to outdoor pursuits.

Interim reports from Carl Allen reveal electronic submission of abstracts continues to work very well. We greatly appreciate the ability of our members to accommodate change as the Academy makes a number of alterations. As mentioned previously, additional improvements are coming. The Academy has purchased limited digital equipment which will be avail-

able for use during the Banff meeting. Although they may be discontinued in the future, 35mm projectors also will be available during both essay sessions. Due to the logistics involved at the meeting site, **ALL** Powerpoint essay presentations **MUST** be submitted to the Essay Chairman by **April 14**. All other essays will be presented with a single 35mm projector. All digital presentations submitted to the Essay Chairman will be guarded closely prior to the meeting and purged immediately following presentation. The Powerpoint presentations must be submitted on CD-R and be fully compatible with Windows XP and Powerpoint XP. The presentations should be kept to a minimum size. Due to their large size, tiff images should not be used in any presentation. If you have any questions, please feel free to contact me.

All digital equipment will be operated by volunteers recruited by me. This is a difficult, time-consuming and stressful task. Please cooperate fully and be patient as we work through our first

meeting while confronting both expected and unexpected difficulties.

For some time, Executive Council of AAOMP has been working to develop closer ties with the American Cancer Society in an effort to educate the public and other professionals about oral cancer and the abilities of oral and maxillofacial pathologists. In this vein, Brad Neville in concert with Terry A. Day, MD (also active in Yul Brynner Head and Neck Cancer Foundation) published a wonderful article in CA – A Cancer Journal for Clinicians. The article was the cover story of the July/August issue and was published in full color with numerous excellent clinical photographs. ACS has agreed to add the membership of our Academy to their subscription list for this journal, with initial issues being received by all members in the near future.

The interaction between ACS and AAOMP needs to extend beyond our Executive Council. Meaningful cooperation can be obtained only if

continued on page 8

The AAOMP is an ADA CERP recognized provider.

Spring 2003

ABOUT BANFF AND THE RIMROCK RESORT

Built on the side of Sulphur Mountain, the resort is nestled high above the picturesque town of Banff in the heart of the Canadian Rockies.

The Rimrock Resort is casually elegant, offering simply breathtaking views from all rooms... rugged, snow-capped peaks and lush, tree-filled alpine valleys. The Resort's green marble and sandy limestone exterior augment a pastoral blue and green colour scheme, playing off of the surrounding area's trees, sky, snow and rock.

Elk, deer and bighorn sheep regularly visit the town site and the Rimrock's courtyard. It's not unusual to see these majestic animals just feet away.

The deadline for the block of rooms reserved by AAOMP is April 1, 2003. All rooms not secured with a one night's deposit will be released. Reservation requests made after the cut-off date will be subject to availability at the time of the request. Based on today's exchange rate of \$1.51, the room rate per night is: Superior - \$112.58 Single/\$115.89 Double; Deluxe - \$127.15 Single/\$130.46 Double; Premium - \$141.74 Single/\$145.03 Double. Triples and quads are available, please call the Rimrock directly for those rates.

The Rimrock Resort Hotel
Mountain Avenue, P.O. Box 1110 • Banff, Alberta, Canada T1L 1J2
Telephone: (403) 762-3356 Fax: (403) 762-4132 Email: www.rimrockresort.com
Reservations: Canada & US: (800) 661-1587 Alberta: (800) 372-9270

HOTEL CANCELLATION NOTICE

Please be advised that if you think you might have to cancel your room reservations at the Rimrock Resort, please do so on or before May 5, 2003.

The Rimrock Resort has a strict policy that if you cancel after that date, YOU will still be responsible for your room at 100%.

GENERAL INFORMATION

REGISTRATION

Individuals are encouraged to register by mail as soon as possible to avoid delays on-site. Registration forms postmarked on or after April 21, 2003 and individuals registering on-site will be charged an additional \$25.00 fee. A registration fee for spouses attending the meeting is being charged to offset a portion of the cost of the services which the academy provides them. You must register to attend any portion of the meeting. To register, fill out the registration form, (available on the website) attach your check payable in U.S. funds to American Academy of Oral & Maxillofacial Pathology (AAOMP), and mail both to:

AAOMP
710 E. Ogden Avenue, Suite 600
Naperville, Illinois 60563-8614 U.S.A.
Toll Free 888/552-2667 or 630/579-3252

Additional Office Information
Fax: 630/369-2488, E-Mail: aaomp@b-online.com
Liz Lenard, Co-Executive Director
Janet Svazas, Co-Executive Director

MICROSCOPES AVAILABLE

Microscopes will be available for slide review and informal consultations in the CCA/Speaker Ready Room.

BANFF SCHEDULE

Friday, May 16

2:00 pm Executive Council Meeting

Saturday, May 17

8:00 - 5:00 pm Fellowship Exam
8:00 - 5:00 pm Fellowship Committee
8:30 - 11:30 am CE #1 24th Annual AFIP Seminar
1:00 - 5:00 pm Symposium

Sunday, May 18

8:30 - 11:30 am CE #2 - Dr. Tyring
CE #3 - Dr. Arendt/Bernstein
CE #4 - Dr. Rees
2:00 - 5:00 pm CE #5 - Dr. Hood
CE #6 - Dr. Barnes
CE #7 - Dr. Camisa
6:00 - 7:30 pm Welcome Reception

Monday, May 19

7:00 - 8:00 am Editors' Breakfast
Iowa Breakfast
Navy Breakfast
8:00 - 12:30 pm Essay I
12:00 - 1:00 pm Program Directors' Lunch
12:30 - 1:30 pm Army Luncheon
2:00 - 5:00 pm Fellows' Business Meeting
3:00 - 4:30 pm Spouses' Reception
5:00 - 6:30 pm Canadian Reception
Indiana Reception
6:00 - 7:30 pm Emory Reception
9:00 - 10:30 pm Residents' Reception

Tuesday, May 20

7:00 - 8:00 am Education Committee Breakfast
8:00 - 11:30 am Founder's Memorial Seminar
11:30 - 1:00 pm Past Presidents' Lunch
1:00 - 5:30 pm Essay II
6:00 - 9:00 pm President's Reception & Banquet

Wednesday, May 21

9:00 - 11:00 am Clinical Pathology Conference

2003 CONTINUED COMPETENCY ASSURANCE PROGRAM

(3 credits)

The Academy is once again sponsoring a Continued Competency Assurance program (CCA). The registration fee for members is \$50 and \$65 for nonmembers. You should include it with your registration fees. In the past, the CCA was available for Diplomates only, but on a trial basis, it will be offered to all AAOMP members at the Banff meeting in 2003.

The AAOMP CCA is in a self-assessment format. Upon arriving at the meeting, participants should pick up their CCA packet from the registration desk. Each packet will contain self-assessment questions relevant to the CCA materials provided at the meeting along with an AAOMP CCA Participation Document.

The CCA cases will be available for review in the microscope room. See the Schedule at a Glance for times and location. The cases are individually packaged with appropriate histories, clinical photographs, radiographs and glass slides. Each of the 20 cases should be reviewed individually and completely and returned to their container. Upon completion of the CCA, each registrant should return the Participation Document to the registration desk. At that time, the diagnoses, discussion and references will be supplied for all cases presented.

The American Board of Oral and Maxillofacial Pathology will be provided with the list of completed participants.

MEETING PROGRAM AND SCHEDULE

Friday, May 16, 2003

2:00 pm

Executive Council Meeting

Saturday, May 17, 2003

8:00 am - 5:00 pm

Fellowship Examination and
Fellowship Committee Meeting

8:30 am - 11:30 am

CE Program #1 (3 credits)

24th Annual AFIP Seminar

Esther L.B. Childers, COL, DC, USA

Charles W. Pemble, Col, USAF, DC

Gary L. Ellis, DDS

Robert D. Foss, CAPT, DC, USN

Stephen B. Williams, COL, DC, USA

Kevin R. Torske, LCDR, DC, USN

Carla R. Penner, DDS

Ten challenging surgical pathology cases will be presented. The AFIP diagnosis for each will be offered and discussed in the context of the attendees' diagnoses. The Armed Forces Institute of Pathology, in conjunction with the American Registry of Pathology, is an international reference center for pathology. An act of the United States Congress authorizes this Department of Defense agency and its 23 departments to render consultative opinions on challenging and interesting cases from military, federal, and civilian pathologists worldwide. The Department of Oral and Maxillofacial Pathology maintains over 60,000 cases in the Registry of Oral and Maxillofacial Pathology.

Microscopic slides of the cases to be presented will be sent, in advance, to the first 50 registered participants. These do NOT have to be returned; however, we do ask that these 50 pathologists "pay" for their slide set by sending us their diagnoses for the cases. We use them as a framework for our discussions. All attendees will receive a CD "handout" containing histories, diagnoses, discussions, and references. A CD that

also contains numerous representative images of each case is available for purchase, after the meeting.

Objectives:

1. To present rare, unusual, or challenging cases from the Registry of Oral and Maxillofacial Pathology.
2. To discuss the development of a clinical and histopathologic differential diagnosis.
3. To provide the rationale for the design and use of adjunctive histopathologic, immunohistochemical, and molecular studies as deemed appropriate.

1:00 pm - 5:00 pm

Symposium (4 credits)

Lakshman (Sam) Samaranayake, BDS, DDS,

FRCPath, FCDSHK, FHKCPATH

"Oral Candida and Other Exotic Fungi: the Ominous Opportunists"

The advent of the human immunodeficiency virus infection and the increasing prevalence of compromised individuals in the community due to surgical and medical advances have resulted in a resurgence of oral candidial infections and, other rare mycoses which were once considered exotic.

Objectives:

1. This course will provide a comprehensive overview of the current developments and, the possible future directions related to the following features of Candida and the diseases they cause:
 - A. the biology of Candida species including their virulence
 - B. host factors mediating candidiasis
 - C. classification of oral candidiasis
 - D. clinical variants of oral candidiasis
 - E. laboratory diagnosis including molecular tools
 - F. antifungal agents: the old and the new and,
 - G. exotic oral mycoses such as aspergillosis, cryptococcosis, histoplasmosis and mucormycosis.

MEETING PROGRAM AND SCHEDULE

Sunday, May 18, 2003

8:30 am - 11:30 am

CE Program #2 (3 credits)

Stephen K. Tyring, MD, PhD

"Mucocutaneous Virology"

Eight human herpesviruses have been identified and 11 antiviral drugs are Food and Drug Administration approved for their therapy. The herpesviruses are unique in that they all may cause primary infection, establish latency, and then reactivate if conditions of altered immunity develop. Over 30 antiviral drugs are now available for a variety of infections. Prophylactic vaccines are available for 12 viral infections and are much more effective (and cost effective) than antiviral drugs in controlling viral epidemics. These interventions are best utilized in conjunction with proper education and other public health measures.

Objectives

1. Discuss new treatments and prevention for human papillomavirus infections.
2. Discuss new treatments and prevention for human herpesvirus infections.
3. Discuss new treatments and prophylaxis for HIV infections.

8:30 am - 11:30 am

CE Program #3 (3 credits)

Douglas M. Arendt, DDS, MS

Mark L. Bernstein, DDS

"CSI for the Forensic Odontologist"

The impact of 911 has thrust the role of the Forensic Odontologist and other disciplines into the public limelight. The contemporary nature of current forensic challenges, scientific advances and popularity in the press with regard to forensics, warrants development of a forensic update for our community. The course will develop a specific forensic theme or focus each year.

Module 1 (2003): Forensic identification and mass fatality organization

How does the 21st century Forensic Odontologist provide assistance to law enforcement and other agencies? Advances in digital imaging capture and enhancement, as well as other tools aid the Odontologist in the identification arena. This module will provide an incident/scene approach to identification, provide a brief historical review of past mass fatality incidents, discuss challenging cases and expand the participants knowledge of the varied means the Odontologist employs in rendering identifications.

Module 2 (2004) Medico-legal

This module will focus on the role of the Odontologist in the medical-legal arena. Specifically the goal is to explain how the Odontologist obtains and uses evidence in pattern injury analysis (bitemarks) and discuss the impact, extent and diagnosis of "abuse" cases in the US (spouse, child & elder). In addition we will address the legal and scientific dilemma the INS (Immigration Naturalization Service) faces with regard to age assessment cases of illegal aliens.

Module 3 (2005) CSI and the press, "high profile and challenging cases"

The public zeal for "forensics" and exploitation by the media of this broad topic merits a critical and scientific review. This module will discuss a number of recent and historical high visibility forensic cases. The focus will be a review of both the nature of the case/crime as well as an understanding of the role the forensic experts played.

Objectives:

1. Gain a basic knowledge of both the iatrogenic and skeletal landmarks that can be used to render identification.
2. Obtain an understanding of "who does what" if called upon to provide forensic services as so many did subsequent to 911.
3. Gain an understanding of the latest advances that assist the forensic teams in rendering identifications.
4. Understand the limitations as well as the advances the Odontologist employs in the medico-legal arena.

MEETING PROGRAM AND SCHEDULE

5. Gain awareness of the demographics, reporting obligations, support resources and clinical stigmata in diagnosing spouse, elder and child "abuse"
6. Gain perspective of a select number of recent and historical forensic cases that made it into the press and many a paperback.

8:30 am - 11:30 am

CE Program #4 (3 credits)

Terry D. Rees, DDS, MSD

"Controversies in Oral Medicine"

In recent years numerous controversial issues have arisen regarding the recognition, diagnosis and management of some oral mucosal diseases and disorders. Although evidence based data is still lacking regarding several of these conditions, a growing amount of information suggests that these issues can be resolved to a reasonable degree and that patients can be successfully managed. In this seminar we will discuss the diagnosis and management of oral contact allergic reactions, drug induced mucosal diseases, a variety of mucocutaneous diseases, xerostomia and burning mouth syndrome. The discussion will be based in part on data accumulated in the Stomatology Center at Baylor College of Dentistry.

Objectives:

1. A working knowledge of diagnostic methods useful in identifying specific mucosal diseases.
2. An understanding of the possible relationship between mucosal diseases, underlying systemic diseases and the potential for malignant transformation.
3. Ability to successfully manage oral health in affected individuals.

2:00 pm - 5:00 pm

CE Program #5 (3 credits)

Antoinette Hood, MD

"A Primer of Dermatopathy for the Oral Pathologist: Tumors and Inflammatory Lesions of the Head and Neck"

10 cases of tumors and inflammatory lesions typically

occurring on the head and neck region will be presented. These cases will be used as a springboard for discussion disorders of relevance to an oral pathologist and will include the following:

*Problematic melanocytic lesions
Adnexal tumors
Vascular and fibrous tumors, and
Common inflammatory lesions biopsied for diagnostic purposes*

Clinical-pathologic correlation will be emphasized. All attendees will receive glass slides. **These glass slides must be returned at the meeting site.**

Objectives:

1. At the end of this session the participant should be more comfortable with the terminology used by dermatopathologists;
2. Recognize the histopathology of common cutaneous lesions on the head and neck;
3. Be able to generate a differential diagnosis for tumors and inflammatory lesions.

2:00 pm - 5:00 pm

CE Program #6 (3 credits)

Leon Barnes, MD

"Selected Soft Tissue Tumors of the Head and Neck"

Participants will be provided with a set of microscopic slides and appropriate clinical histories for independent study. Each case will be discussed in detail, and a comprehensive manual will be distributed. **These glass slides must be returned at the meeting site.**

Objectives:

1. Acquaint the participant with a variety of benign and malignant soft tissue tumors of the head and neck.
2. Address important clinical, histological, immunohistochemical and cytogenetic features that are useful in differential diagnosis.

2:00 pm - 5:00 pm

MEETING PROGRAM AND SCHEDULE

2:00 pm - 5:00 pm

CE Program #7 (3 credits)

Charles Camisa, MD

"Oral Dermatology for the Clinician"

There is a significant amount of overlap between the fields of dermatology and oral medicine. This course will attempt to bridge the gap by clearly demonstrating the clinical features of dermatoses which occur with and without oral manifestations. The focus will be on using clinical clues in the differential diagnosis.

The course will be divided into three segments:

1. Common dermatoses of the head and neck region, e.g. lentigo maligna and seborrheic dermatitis.
2. Systemic diseases with both oral and skin manifestations, e.g. pemphigus and pemphigoid.
3. Genodermatoses, e.g. nevoid basal cell carcinoma syndrome.

Objectives:

1. To be able to recognize the 10 most common dermatoses of the head and neck region.
2. To be able to formulate a differential diagnosis of immunobullous diseases.
3. To discuss the variety of and significance to health of extraoral manifestations of genodermatoses.

6:00 pm - 7:30 pm

Welcome Reception

Monday, May 19, 2003

7:00 - 8:00 am

Editor's Breakfast

Iowa Breakfast

Navy Breakfast

8:00 - 12:30 pm

Essay I (4.5 credits)

12:00 - 1:00 pm

Program Directors' Lunch

12:30 - 1:30 pm

Army Luncheon

2:00 - 5:00 pm

Fellows' Business Meeting

3:00 - 4:30 pm

Spouses' Reception

5:00 - 6:30 pm

Canadian Reception

Indiana Reception

6:00 - 7:30 pm

Emory Reception

9:00 - 10:30 pm

Resident's Reception

Tuesday, May 20, 2003

7:00 - 8:00 am

Education Committee Breakfast

8:00 - 11:30 am

Founders' Memorial Seminar (4 credits)

Christopher D.M. Fletcher, MD, FRCPath

"Soft Tissue Tumors"

The aim of this seminar is to present and discuss a selection of soft tissue neoplasms which show predilection for the oral cavity and adjacent structures. The importance and relevance of accurate subclassification of sarcomas will be discussed, as also will differential diagnosis. The rule of modern diagnostic techniques (including molecular genetics) will be described as appropriate.

Objective:

1. To better understand the diagnosis, differential diagnosis, natural history and clinical implications of soft tissue tumors in the oral cavity and adjacent structures.

MEETING PROGRAM AND SCHEDULE

11:30 - 1:00 pm

Past Presidents' Luncheon

1:00 - 5:00 pm

Essay II (4.5 hours)

6:00 - 9:00 pm

President's Reception and Banquet

Wednesday, May 21, 2003

9:00 - 11:00 am

Clinical Pathology Conference (2 credits)

PRESIDENT'S MESSAGE *(continued)*

every member residing in the states attempts to become active on a local level. Please visit the website of the American Cancer Society (<http://www.cancer.org>). On the homepage, there is a link called "In My Community" where you can enter your zip code or city. This provides the contact information for the local ACS and a list of current/near-future events. You also may call ACS nationwide toll-free at 1-800-ACS-2345. Please take advantage of this opportunity and become involved.

Recently, Kodak sent AAOMP notification of a website that is designed for general dentists who desire to present online cases for second opinions related to diagnosis and treatment planning. For those with an interest, please visit www.DentalTown.com or email howard@dentaltown.com.

Academy office received a short note from Blackwell-Munksgaard. Special membership rates have been established for members of AAOMP for the Journal of Oral and Maxillofacial Pathology. For an individual subscription, the combined print and online price is \$364, down from \$532. The journal also is available online only at 90% of the full price. If interested, contact memberships@oxon.blackwellpublishing.com.

I hope everyone is planning to attend our upcoming meeting in Banff. The program and environment will combine to make a most memorable event. I'll see you there.

Doug
