Free and Half-Price Sessions for Residents at Puerto Rico Meeting

AAOMP's Director of Education Dr. John Hellstein has announced reduced rates for Residents for designated sessions this year only, on a trial basis.

Residents can attend two continuing education courses for free, on Saturday, April 30th. These sessions are Mohs Surgery of the Head and Neck with Histopathologic Correlation (Dr. Marta Van Beek), and Oral Mucosal Lichenoid Diseases: Diagnosis and Management (Dr. Alan Gould).

Residents can attend the AAOMP Seminar and the Symposium on Friday April 29 for half-price. Resident rates will be \$55 for each of these two sessions.

Residents must pre-register for each of these courses. If any Residents have already registered and paid for these sessions, Karen Benton will adjust the registration fee on request. Residents should call her at (630) 510-4552 or (888) 552-2667.

Dr Hellstein emphasized that this offer is only valid this year. In May, Council will discuss the possibility of permanently offering Resident discounts for future annual meetings.

PRESIDENT'S MESSAGE

Dear AAOMP Fellows and Members,

It is certainly a pleasure for me to inform you that Dr. Mark Lingen, our Editor, has recently accepted the position of Editor-in-Chief of Oral Surgery, Oral Medicine, Oral Pathology, Oral Radiology, and Endodontology. This is a significant accomplishment for Mark and an honor for our specialty, since all previous Editors-in-Chief have been Oral and Maxillofacial Surgeons. To have one of our own step up and take control of the Journal is a testament to the job Mark has done as our section editor. Please join me in congratulating Mark on this achievement. He will officially take over the reins as EIC on April 1, 2011.

AAOMP's own Mark Lingen, new Editor-in-Chief of Quad O.

Harvey Kessler

Mark has been negotiating this position with the publisher for awhile now, so at our Interim Council meeting on November 13th, Council discussed further actions that would be necessary if Mark was appointed EIC. Mark indicated that he would not feel comfortable remaining as Section Editor for Oral and Maxillofacial Pathology while also serving as EIC, so Council elected to ask Dr. Paul Edwards to take over as our Section Editor. Paul has been serving as the Section Editor for the CPC section of the Journal for awhile now and he seemed like the most logical choice, given his experience, to step into Mark's big shoes. Paul graciously accepted the offer and he will take over as our Section Editor on April 1 to complete the final 2 years of Mark's term of office.

Using recommendations provided by Mark, Council decided to ask Kurt Summersgill to take over the position of Section Editor for the CPC section of the Journal. Kurt accepted the position without reservation, and will succeed Paul on April 1.

I would like to extend heartfelt thanks to Paul and Kurt for their willingness to accept these extra duties on behalf of the Academy. These are both big jobs that will require a considerable time commitment from them, but I am confident they will continue the model of excellence we come to expect in OOOOE.

IN MEMORIAM

Seymour Hoffman: SEM pioneer, naval officer, musician

Seymour Hoffman, U.S.N. D.C. Ret. ("Sy"), age 90, of Birmingham, AL died on January 13, 2011. He was a pioneer in the application of Scanning Electron Microscopy to pathology; his SEM studies of the pathogenesis and prevention of early caries were the first in the USA.

Dr Hoffman was born and received his early education in New York City. He was married to Margaret Morris. He received his DDS from the University of Buffalo in 1945. After graduation, he was commissioned as a Lieutenant in the dental corps of the US navy reserve and also spent several years in general practice as a civilian. During the Korean War, he returned to active duty in the navy. He attended the general post-graduate course at the Navy Dental School, followed by graduate work in general and oral pathology at Boston University, and pathology residency program at Naval Medical School and Naval Dental School. He served as a naval officer over three decades, including service as senior dental officer on board the USS Saratoga and as Chairman of Oral Pathology at the Armed Forces Institute of Pathology. At his retirement from the navy, he was awarded the US Legion of Merit medal for outstanding performance of duty. He was appointed Professor of Pathology and Dentistry at the University of Alabama at Birmingham in 1976. He was a Fellow of the AAOMP and a 1970 Diplomate of the ABOMP.

Dr Hoffman described his non-professional interests as "music, golf, and fishing". He played tenor saxophone and clarinet in various local big swing and Dixieland bands around Washington and Birmingham, and he began a program for communicating art to the blind and visually impaired at the Birmingham Museum of Art. He was selected by the Museum as a Life Docent in 2005.

This kind, passionate, brilliant Renaissance man will be deeply missed by all who knew him.

Deep Sea Fishing Charters in San Juan

Roy Eversole says “Let’s go hook ‘em!”

Interested in joining in on a big game fish charter before and after the AAOMP meeting?

Boats: 32-35 ft sportfishers, 4 persons per boat \$250 per person full day charter (can also do ½ day) fully equipped with tackle, rods and bait. BYO lunch and beer.

Two days to choose from: Thursday April 28 and Wednesday May 3.

Please let Roy know if you are interested, so he knows how many boats to book. Once we have a head count, we will request a \$100 deposit payable to AAOMP. Don’t send any money yet.

To join the fun, please contact Roy Eversole at (800) 955-4765, lrebge@cox.net

ESTOP 2010

The annual Eastern Society of Teachers of Oral Pathology (ESTOP) was held in Milwaukee, Wisconsin on October 2-3, 2010. The featured seminar, Barbara Wilson, M.D., Director of the Dermatology residency program at the Medical College of Wisconsin, spoke on "The ABCs of Dermatology". Over two dozen oral and maxillofacial pathologists presented and exchanged nearly 75 interesting, unique and unusual clinical, radiographic and microscopic cases. Jerry Bouquot distributed a prototype of his "Must Know" oral lesions PowerPoint presentation, with over 570 photographs, radiographs and photomicrographs.

The location of the 2011 ESTOP meeting is scheduled for Indianapolis, IN and is being organized by Dr. Lawrence Goldblatt. Stay tuned for more information as it becomes available.

In The News

Congratulations go out to Dr. John Hellstein, Director of Education. John has been appointed Chair of the ADA Council on Scientific Affairs.

Congratulations to Dr. Thomas H. Morton, Jr., Professor and Acting Chair at the University of Washington, who after being awarded the 2010 Martin Luther King Jr.

Distinguished Service Award at the university, has been awarded the 2011 Dean’s Club Honorary Lifetime Member Award. This award was established to recognize a Dean’s Club member who has given outstanding service to the UW School of Dentistry.

General & Hotel Information

REGISTRATION

Register by mail as soon as possible to avoid delays on-site. Registration forms must be received and postmarked by April 1, 2011. After April 1, 2011, individuals must register on-site and will be charged an additional \$50 fee. A registration fee for spouses attending the meeting is being charged to offset a portion of the cost of the services that the Academy provides them. You must register to attend any portion of the meeting. To register, fill out the registration form (also available at www.aaomp.org). Attach your payment in US funds to American Academy of Oral and Maxillofacial Pathology (AAOMP) and mail to:

AAOMP
214 N. Hale Street
Wheaton, Illinois 60187
Toll Free: 888-552-2667 or 630-510-4552
Fax: 630-510-4501
Email: aaomp@b-online.com

FELLOWSHIP EXAMINATION

The examination will be held on Thursday, April 28, 2011 from 8:00 am – 5:00 pm.

HOTEL INFORMATION

Caribe Hilton Hotel
1 San Geronimo St.
San Juan, Puerto Rico 00901
(787) 721-0303
www.caribehilton.com

Call and mention "AAOMP" to receive our special rate of \$209 Single/Double rate + 9% tax.

To book your room online, go to www.aaomp.org and click on the "Annual Meeting" tab. There you will see the link to book your room online. Using the online booking system will also allow you to see an approximate total for your hotel room fees before you book it.

ADDITIONAL RESORT FEES AND SERVICE CHARGES

In addition to the room rate listed above, a 14% resort fee will be added per room, per night. The resort fee will be posted to your guest room portfolio. This resort fee covers the following amenities:

- Daily in-room coffee (one-bag per day)
- Daily newspaper
- Day use of tennis courts
- Use of the fitness center
- Beach activities (umbrellas, chairs, games, towels, etc.)
- 15% discount on Olas Spa

The following service charges will also be posted to your guest room portfolio. These fees are separate from your room rate and taxes:

- Porterage/Bellman: \$4.50 per person (includes both check-in and check-out)
- Room Attendant/Maid: \$0.50 per room per day
- Municipality Tax: \$5.00 per person, per room, per day

You can make your hotel reservations online on AAOMP's special Hilton registration page by copy and pasting this link into your web browser:

http://www.hilton.com/en/hi/groups/personalized/SJNHIIH-AAOA11-20110424/index.jhtml?WT.mc_id=POG

Or go online at www.aaomp.org under the annual meeting tab and click on the direct link. It will pre-calculate your hotel fees before booking the room

so you will know your actual costs. There is also a one-night's deposit that you will need to put down as well at the time of booking.

RESIDENTS

Unfortunately, this year there are no special resident rates available at this property. If you are interested in sharing a room with a fellow resident, please complete the "Roommate Program" form and send it to AAOMP headquarters by March 1st. AAOMP doesn't guarantee that you will be matched with a roommate.

PRICING AT HOTEL FOOD OUTLETS

The hotel restaurant pricing is on the higher end, similar to Tucson. The hotel's breakfast buffet that has everything from fruits, juices, bagels, loaves, breads, danish, eggs, bacon, french toast, pancakes, made to order omelets and egg dishes, etc. is \$26 per person, plus tax and gratuity.

The Pina Colada Club restaurant or the Atlantico pool bar restaurant have sandwiches, hamburgers, soups, salads, etc. You should anticipate that lunch for two people, for example: a chicken wrap and a ruben sandwich, both with fries, an appetizer and a cocktail for each person would cost you approximately \$35-\$40 with tip.

If you are looking to have a nice higher-end dinner, there is a Morton's Steakhouse on property. Everything on the menu is a la carte. Dinner for two, without drinks, is approximately \$100 per person. That would be inclusive of the main meat or seafood dish, a starch, vegetable and individual dessert.

There are also other places to eat off property. For example, at the Conrad Hotel in the Condado area, there is a very good noodle bar where everything is made fresh to order, even the egg drop soup and again you should anticipate that cost at approximately \$30-\$40 with tip.

There are also plenty of restaurants in Old San Juan, which is about 5-10 minutes away from the hotel. You can take a cab or there is a city bus that you can catch just outside of the hotel area for .75 each way. You can also walk it. The hotel concierge says it takes about 1/2 hour to walk - with the humidity, but keep in mind the humidity is very high.

GROUND TRANSPORTATION

Cabs in Puerto Rico are on a zone-to-zone flat rate. A cab from the airport to the hotel is \$19 plus a \$1 per luggage bag (it seems that only luggage with wheels gets charged the \$1, laptop bags, other carry-on type bags they didn't seem to charge for).

However, by the same token, the zone-to-zone can cost you \$10-\$15 to go a short distance from the hotel. For example, if you wanted to go to the casino at the Conrad or over to the Condado area, which is relatively close, you can walk it or you can take a cab that would cost you \$12, plus tip. The same can be said for taking a cab over to Old San Juan or you can take the city bus for .75 cents each way.

HILTON HONORS - GOLD AND DIAMOND MEMBERS

For those of you who may be Hilton Honors Gold or Diamond members, there is a special check-in area for you at the hotel, there is also a separate tower of rooms and a free continental breakfast at one of the hotel's restaurants or Starbucks Coffee (right on property) or \$11.00 off the breakfast buffet in Palmeras restaurant.

TOURS AND ACTIVITIES

For those of you who are interested in setting up tours or activities such as: a tour of the rainforest (highly recommend), a tour of the Bacardi Rum factory (highly recommend), a tour of Fort San Cristobal and El Morro, deep sea fishing, golf, snorkeling, an

evening trip to the bio-bay, day trips to other islands, scuba or even a tour of the caverns, the hotel's concierge is able to set-up your plans for you.

There is a rental car facility on site as well should you want to venture out on your own.

ATTIRE

As we are going to be in tropical location, where it will be 85+ degrees with 100% humidity, you will want to dress accordingly. We will be having outdoor events such as the Welcome Reception, which will be on the beach and the Resident's reception, which will be in a grassy area. You are going to want to wear casual sandals or flip-flops as we will be standing in sand.

The meeting attire is business casual. Shorts, capris, and docker-type pants are appropriate. The entire hotel is basically an open-air facility. There are not a lot of closed doors throughout the common areas of the hotel.

You will want to make sure that you bring a sweater or light jacket if you normally get cold in the meeting rooms. While we will do our best to keep the temperature amenable to everyone, the meeting rooms themselves will be air conditioned, but outside the meeting rooms it is not. The general break area, registration and the exhibit tables are in non-air conditioned foyer areas.

OTHER ITEMS TO PACK

Make sure that you remember everything but the kitchen sink when packing for Puerto Rico because buying any amenities that you might have forgotten at home are about 3x the price at the hotel sundry shop.

Be sure to pack plenty of:

1. Sunscreen, suggest a minimum of 30, the sun is intense down there and it doesn't take long to burn.
2. Bring a hat or visor to protect your head and face.
3. Swim shoes, if you like to swim in the ocean, the hotel does have its own beach that is a part of the Atlantic Ocean and there are rocks and shells at the bottom. You can also wear them in the pool.
4. Prescription and over-the-counter medications. Make sure that you bring sinus and cold medicines, nasal decongestants, ibuprofen, aspirin, etc.
5. Sunglasses
6. Swimsuits and cover-ups, flip-flops/sandals
7. Camera – The views of the ocean are beautiful, as well as the wildlife roaming around the hotel's garden area and in the cages in the hotel lobby - not to mention the rainforest and other historical sites in Old San Juan.
8. If you like to have snacks in your room, be sure to bring those as well. Again, the sundry shop is 3x the price of a normal store.

REMINDERS

If you are a U.S. Citizen you DO NOT need your passport. Puerto Rico is a U.S. territory and therefore, your driver's license or state ID is acceptable.

You can't bring alcohol on to the plane in your carry-on bags on your way home. It needs to be in your checked baggage. If you plan on purchasing any wines, rum or other types of alcohol, you will want to be sure that you can pack it in your checked luggage. You might want to pack an extra bag to protect the bottles in your suitcases. Otherwise, if you want to carry it on the plane, you have to wait until you are on the other side of security and purchase it in the duty free shops at the airport.

If you have any further questions or concerns, please contact AAOMP staff at aaomp@b-online.com

Meeting Details

Thursday, April 28

8:30 am - 11:30 am

AAOMP Seminar – (Replacing AFIP Seminar)

John K. Kalmar, DMD, PhD
Bruce F. Barker, DDS
John E. Fantasia, DDS
Lawrence I Goldblatt, DDS, MSD
Duane R. Schafer CAPT DC USN, DDS
CE Program #1 (3 credits)

Ten challenging surgical pathology cases will be presented. The diagnosis for each will be offered and discussed in the context of the attendees' submitted diagnoses.

The five speakers are all vintage Academy members who will share interesting cases they have encountered from the head and neck region. Cases selected typically include recently described entities, rare lesions or variants of well-characterized tumors. Emphasis will be placed on the histopathologic differential diagnosis and use of adjunctive laboratory studies. A brief synopsis of the condition will also be provided.

All registrants will receive virtual slides of all cases prior to the meeting. These DVDs need not be returned, however, attendees are strongly encouraged to submit their diagnosis for the cases to help guide the presentations. Attendees will receive a handout containing histories, diagnoses, discussion and references.

Objectives:

1. To review rare, unusual, or challenging surgical pathology cases from the oral and maxillofacial region.
2. To outline the development of a clinical and histopathologic differential diagnosis.
3. To provide the rationale for the use and application of adjunctive histopathologic, immunohistochemical and molecular studies in challenging diagnostic scenarios.

1:00 pm - 3:00 pm

Symposium: Clinical Implications of HPV in Oral Cancer Pathogenesis

Maura L. Gillison, MD, PhD
CE Program # 2 (3 credits)

This course will begin with an introduction on human papillomavirus, its history and general demographics. A major portion of this course will address the predictive value of human papillomavirus in the oral and oropharyngeal region as well as prognosis and survival data.

Objectives:

At the end of the symposium, the participant will:

1. Know the role of papillomavirus in the head and neck region.
2. Have a better understanding of the current knowledge base associated with the human papillomavirus.
3. Better understand the oncologic role of the human papillomavirus and thoughts about future research on the human papillomavirus in head and neck cancer.

3:30 pm - 4:30 pm

PECOS Panel Discussion

Saturday, April 30

7:00 am – 10:00 am
7:00 am – 10:00 pm
7:30 am – 5:00 pm
7:30 am – 5:00 pm

Spouse Breakfast
CCA Exam
Registration
Coffee Service

8:30 am – 11:30 am

Interesting Cases in Head and Neck Pathology

Robert Robinson, MD, PhD,
CE Program #3 (3 credits)

A group of 10 lesions encompassing tumors, benign and malignant, as well as inflammatory processes that affect the head and neck will be presented. The sites of origin of these lesions include the nose and paranasal sinuses, soft tissues, oral cavity and thyroid as well as some lesions that occur in or around the base of the skull structures. Some of the cases will be illustrated as metastatic processes, including visceral malignancies, to the head and neck region, always a difficult but important issue when evaluating tumors in this region. When appropriate, the use of ancillary studies such as immunohistochemistry will be highlighted. The most important aspect of the lesions illustrated will be differential diagnoses that must be entertained when these processes are encountered.

Objectives:

By the end of this course the participants:

1. Will learn about a variety of tumors and disease entities in the head and neck region, each representing major disease categories of which pathologists working in the field of head and neck pathology should possess some working knowledge.
2. Will learn to develop an appropriate differential diagnosis on the cases presented.
3. For the diseases presented, will learn which immunohistochemical or molecular testing would be most appropriate.

8:30 am – 11:30 am

Mohs Surgery of the Head and Neck with Histopathologic Correlation

Marta Van Beek, MD
CE Program #4 (3 credits)

There is a significant amount of overlap between the fields of dermatology and oral pathology with Mohs surgery being a mainstay of maxillofacial tumor therapy. This course will attempt to bridge the gap by clearly demonstrating Mohs surgical cases with clinical-pathologic correlations. The course shows numerous photomicrographs along with clinical photos both before and during surgery.

The course will be divided into three segments:

1. Clinical pathologic correlation with the clinical presentation of the presenting lesion and development of the appropriate clinical differential diagnosis.
2. Common and uncommon tumors of the head and neck region, managed through Mohs surgery will be covered.
3. Near the end, a quick summary of the politics of Vitamin D and how a specialty can have a real world impact will be presented.

Objectives:

At the end of this course the participants should be able to:

1. Formulate a differential diagnosis of facial tumors then properly refer and follow-up the patient through the treatment continuum.
2. Update knowledge of the histopathologic features of facial tumors.

8:30 am – 11:30 am

Immunopathology: Tips, Tricks and Getting Out of the Quicksand.

Rodney T. Miller, MD
CE Program #5 (3 credits)

This course consists of three 1-hour presentations, covering a variety of relevant topics regarding the use of immunohistochemistry by diagnostic pathologists. Part 1 will focus on reviewing important technical aspects of immunostaining with emphasis on those aspects that are required to ensure high-quality reproductive stains. Troublesome artifacts and pitfalls that can lead to misinterpretation will be discussed in detail, and steps to avoid these pitfalls are presented. Part 2 will discuss the optimal use of immunohistochemical markers to address the problem of morphologically "undifferentiated" tumors, and will include a number of illustrative case studies. In Part 3, markers useful in determining the primary site of metastatic carcinomas are discussed, and their use illustrated with a number of case studies.

Objectives:

At the end of this course the participants will:

1. Know the basic steps involved in immunostaining and recognize the dangers of using predilute ready-to-use antibodies and the importance of proper antibody dilutions in obtaining optimal stains.
2. Recognize endogenous biotin artifact and know how to abolish it.
3. State how to properly work up a new primary antibody and how to continuously monitor the sensitivity and specificity of antibodies with every stain performed.
4. Know the characteristics of true-positive and false-positive immunostains.
5. Understand the importance of proper controls, and describe a method that can be used in any laboratory to make multitumor sandwich block positive control blocks.
6. Discuss the options available for work up of cases when no paraffin block is available.
7. List the most useful antibodies for assessing "undifferentiated" tumors, and understand the strengths and limitations of the markers.
8. List the most useful antibodies for studying cases of metastatic carcinoma of unknown primary origin, and be able to select appropriate markers when given relevant clinical information.

12:00 pm – 1:00 pm

Speaker/Education Committee Luncheon (by invitation only)

2:00 pm – 5:00 pm

Cone Beam CT: Principles and Applications in Imaging Oral & Maxillofacial Pathoses.

Ernest Lam, DMD, MSc, PhD, FRCD(C)
CE Program #6 (3 credits)

With the emergence of cone beam computed tomography in dentistry, there is widespread excitement in the general dental and specialist communities as strategies are developed for incorporating this novel technology into patient care. Being able to separate the hype from the reality of what cone beam CT imaging can actually offer will be essential to our understanding the potential of this new modality in dentistry, as well as its limitations.

Objectives:

At the end of this course the objectives are to:

1. Develop an understanding of the basic concepts of 3D imaging: imaging physics, image processing and image management.

2. Understand current radiation dose and risk considerations related to cone beam CT imaging.
3. Describe the potential uses of cone beam CT imaging in dentistry in the context of the established imaging modalities with consideration given to risk vs. benefit approach to modality selection.
4. Understand the major limitations of cone beam CT technology in the context of the established imaging modalities.

2:00 pm – 5:00 pm

Mesenchymal Lesions of the Oral and Maxillofacial Region

Julie C. Fanburg-Smith, MD
CE Program #7 (3 credits)

The seminar will be based on DVD virtual microscopic slides. The aim is to present and discuss a selection of soft tissue neoplasms which may present in the oral cavity or adjacent structures. The following topics and subtopics will be discussed:

1. Specialized Myofibroblastic Tumors
2. Myomelanocytic/Melanocytic Tumors
3. Nerve Sheath Tumors
4. Adipocytic Tumors
5. Round Cell Tumors and Genetics
6. Overall approach to soft tissue tumors
 - a. Phenotype and Immunostains
 - b. Classification and Grading

The importance and relevance of accurate differential diagnosis will be stressed. Modern diagnostic techniques (including molecular genetics) will be described as appropriate.

Objectives:

At the end of this course the participants should be able to:

1. Better understand the diagnosis, differential diagnosis and natural history of mesenchymal tumors in head and neck region.

2:00 pm – 5:00 pm

Oral Mucosal Lichenoid Diseases: Diagnosis and Management.

Alan R. Gould, DDS, MS
CE Program #8 (3 credits)

Lichenoid diseases are among the most common symptomatic oral mucosal disorders encountered in the outpatient clinical dental setting. Accurate diagnosis and effective long term control of oral lichenoid disease continue to represent significant challenges in the successful provision of oral health care. This course will seek to provide an analysis of a population of patients presenting with oral mucosal lichenoid disease in a suburban clinical oral and maxillofacial pathology private practice. Aspects of patient diagnosis and management will be emphasized, including medical and family health history, patient medication profile, cutaneous, oral mucosal, and extraoral mucosal clinical manifestations, differential and definitive diagnosis, and principles of patient management. Relative efficacies of specific treatment protocols for oral lichen planus will be compared, and long term clinical outcomes will be examined.

Objectives:

Upon completion of the course, participants will be prepared to:

1. Define oral mucosal lichenoid disease (OMLD).
2. Select findings relevant to OMLD in the patient medical and family health history.
3. List medications and proximal oral agents which may be contributory to the emergence or expression of OMLD.
4. Provide a description of cutaneous, oral mucosal and extraoral mucosal findings which are useful in the assessment of patients with OMLD.
5. Describe the range of oral diseases which may present as OMLD, and methods for distinguishing between these disorders.

- Specify considerations in patient management which will enhance the likelihood of successful treatment.
- Identify specific treatment options for oral lichen planus, with consideration of relative effectiveness and patient risks.
- Illustrate the importance of interprofessional communications in enhancing the probability of long-term positive outcomes in the management of patients with OMLD.

6:00 pm – 7:30 pm

Welcome Reception

Sunday, May 1

7:00 am – 8:00 am

1:00 pm – 5:00 pm

Selected Topics and Diagnostic Pitfalls in Thyroid Pathology

Carol Adair, MD
Founders Memorial Seminar (4 credits)

This course will use case presentations as starting points for the discussion of differential diagnoses and diagnostic pitfalls in thyroid pathology. Topics will include non-neoplastic look-alikes, pitfalls in frozen section diagnosis and how to avoid them, unusual and problematic patterns of thyroiditis, follicular neoplasms vs papillary carcinoma, medullary carcinoma, and poorly differentiated neoplasms in the thyroid. Use of cytology in conjunction with histology will be discussed and illustrated. The participants will receive a set of glass slides, supplemented by virtual slides on DVD to demonstrate cytologic and frozen section finding for some of the cases.

Upon completion of the course, the participants will be able to:

- Identify the differential diagnosis for non-neoplastic processes characterized by a diffusely abnormal thyroid gland
- Recognize frozen section artifacts which may lead to

- misinterpretation
- Incorporate intraoperative cytology with frozen section to improve diagnostic yield on intraoperative consultations
- Distinguish hyperplastic from neoplastic nodules in Hashimoto's thyroiditis
- Recognize two of the more common histologic patterns associated with medications
- Describe features which may help in distinguishing follicular neoplasms from papillary carcinoma, follicular variant.
- Utilize immunohistochemical stains in the differential diagnosis of thyroid nodules (or not!)
- Consider the differential diagnosis of poorly differentiated malignant tumors in the thyroid, both primary and metastatic
- Recognize the classical and not-so-classical patterns of medullary thyroid carcinoma.
